

# Prolytix Biomarker Services

Prolytix provides expert biomarker assay services for bioanalytical and GMP testing, supporting discovery, validation, and monitoring for preclinical and clinical studies. Utilizing advanced platforms, we deliver fit-for-purpose methods, high-quality data, and regulatory-compliant solutions, accelerating drug development and empowering informed decisions for your therapeutic innovations.

## Prolytix Bioanalytical Biomarker Solutions:

- › Pharmacodynamic (PD) and Efficacy Assessments
- › Pharmacokinetic (PK) Assessments
- › Safety and Toxicology
- › Patient Stratification
- › Therapeutic Drug Monitoring

## Prolytix GMP Biomarker Solutions:

- › Batch Release Testing
- › Stability Monitoring
- › Degradation Product Analysis
- › Quality Control
- › Identification of Critical Quality Attributes

## Why Prolytix for Biomarker Services?

- › Expertise in custom method development and kit adaptation
- › Tailored method qualification/validation for specific program needs
- › Advanced single-analyte and multiplex assay capabilities
- › Accurate measurements across human and animal matrices
- › Consultative Approach

## Need a Custom Solution?

Prolytix develops and validates biomarker assays to deliver actionable, high-quality data aligned with regulatory requirements.

Prolytix's expertise in biomarker assays ensures precise, reliable data to support GMP compliance and regulatory approvals.
